About Cotton Bags

- **The bags are made from all natural cotton, and are one hundred percent biodegradable.**
- **They are reusable and recyclable.**
- **These bags are an excellent replacement for plastic bags, which are a big waste issue.**

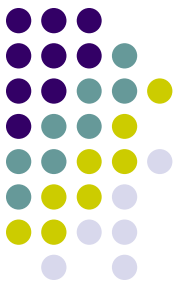

Production Process

- **The production process involves cutting different sizes of cotton cloth pieces and then stretching them on a stretching machine.**
- **The stretched pieces are tailored into different sizes and designs using a sewing machine.**
- **Where it is necessary to include company labels and designs, they can be sewn or just printed to add value to the products.**

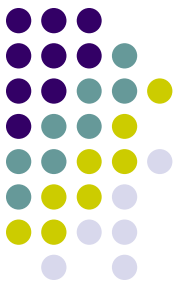

Mass production of Cotton Bags at Cheaper price- possible

Produce non-woven bags of various sizes and shapes, such as non-woven D cutting bags, soft loop bags, strip through bags, T-shirtbags, gife bags, and other products packaging bags.

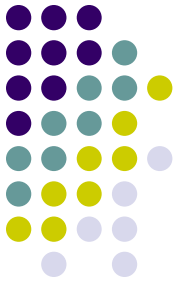

Raw Materials

- **The bags are made from all natural cotton, and are one hundred percent biodegradable**
- **Cotton bags produced from greige cloth have lower margin of profit, whereas, bags produced from dyed cloth have reasonable profitability.**
- **As the plastic Bags are banned, there is very high demand for substitute product**
- **Paper, cloth, Jute are competing products & the cost is going to be the deciding Factor**
